THE Change

THE DAY
FIND YOUR VOICE

Build
THE Change

David - The LEGO® Group

THE DAY
FIND YOUR VOICE

Are you ready to unleash your creativity and design a wild city building for the future?

WHAT TO DO:

Reimagine a building or area in a city that is special to you.
Redesign it so that it works better for future generations of humans and nature.

STEP 1: Choose a city that is special to you. Find out about the local buildings, animals, plants, insects and birds.

STEP 2: Redesign a building so it works for local wildlife, as well as local people (use the preparation worksheet on page 3 to help!).

STEP 3: Build the Change! Create your design using either pen and paper, LEGO® bricks or bits of recycling to build it.

STEP 4: Take a photo of your design and (if you wish) write a short description of your building's features (maximum 200 characters).

STEP 5: [Upload](#) photos and a 200 character description of your children's amazing ideas to our gallery on [LEGO.com](https://www.lego.com) for the whole world to see and have a chance to become our 'Builder of the Week' in our News Detectives resource!

NEED INSPIRATION?

Be inspired by our competition winners Alexa and Thomas

HOW TO BE SUCCESSFUL

Design your building so that it:

1. **Works for local people.** Cities are busy places and all the buildings there have a purpose. Design a building that improves the lives of people.
2. **Works for local nature.** What wildlife lives in the city? What new species would you like to attract there? Think about how you can design the perfect habitat for local animals, plants, birds and insects.
3. **Be good for the planet.** Cities are growing. We need to make sure they are getting greener too. How can you power them using solar panels or renewable energy? What could you do to make your buildings cope better with extreme weather, draughts and floods?

Wild Cities Inspiration

We want you to reimagine a building or area in a city that is special to you.

Plan your Wild City building by answering these questions.

Which city is your building located in?

How does your building work for people?

What animals, plants, birds, insects and weather might you find there?

How does your building work for nature?

Why is your building good for the planet?

Practice drawing your wild city building here.

Label the features. How will it benefit people and nature?
